WGR Southwest, Inc.

(WGR) is an Environmental, Health, and Safety Consulting Firm, having two offices in Northern and Southern California. WGR divides its environmental, health, and safety services into four basic sectors: Regulatory Compliance, Geotechnical, Emergency Response, and Business Applications. We offer multi-media regulatory compliance support in the areas of water, waste, occupational safety & health, and air. WGR is a minority owned small business. Our storm water services include assisting municipalities with their MS4 Permit required Storm Water Management Programs; industrial companies with compliance in relation to their Industrial General Permit; and construction companies as needed or required in regards to their SWPPP programs and BMP implementation.
